THE BEE FAIRY

The Bee Fairy was founded by *Mike and Belinda Palfrey* who have been developing a range of Beeswax based natural skincare and animal products that have minimal impact on the environment as well as a great benefit to all that use them. Over the last few years they have helped create a wildlife haven at Hanley Mill the home of the Bee Fairy with the introduction of wild flower meadows, wildlife ponds and restoration of hedges. This has resulted in an increase of many native species of flora and fauna.

As the business grows it will enable them to give more back to the environment we all live in.

BEESWAX

Natural Beeswax based Products for you and your family

Beeswax is known for its emollient, soothing & softening properties which help the skin to retain moisture. Beeswax is the perfect ingredient for skin care products because the wax esters are very similar to those naturally occurring in human skin.

Advantages of Beeswax on skin

Vitamin A Beeswax is rich in vitamins including vitamin A, which helps in exfoliation, improves skin hydration and reconstruction/regeneration of skin cells living your skin rejuvenated.

Humectant The humectant is the ability to attract, preserve or retain water/moisture. Beeswax has ingredients that help attract water molecules to your skin, hence keeping your skin hydrated, moisturised and healthy over time.

Antibacterial & Antimicrobial It has mild antibacterial properties, which inhibit the growth of fungus and bacteria, also preventing some bacterial and fungal infection. It benefits the skin a lot by helping it fight contamination and in cleaning the skin, leaving it healthy and natural

Anti-inflammatory and Pain reliever Beeswax has anti-inflammatory properties that assist in preventing damage and irritation to the skin; the features also help restore the skin to its normal condition leaving your skin in a better state relieving you of pain which comes from swelling and skin irritation.

Protecting the Skin It forms a film of protective barriers on the skin surface, which keeps out toxins, protects the skin from irritation and other environmental attacks but still allows the human skin to breathe. The same cannot be said for petroleum jelly which clog pores hence suffocating the skin, a reason why it's great as a lip balm ingredient.

Skin healer It has the potential of healing sores caused during chemotherapy and also can be mixed with other oils to treat ailments such as eczema, dermatitis, and psoriasis thus making it a hypoallergenic.

Soothes itching Because it's an anti-allergenic, it can benefit people with reactive or sensitive skin; this is by soothing itching dry skin and reducing the skins sensitiveness.
